WHO WE ARE

Pathfinder Educational Limited is a Manchester-based social innovation company delivering dignity-infused employability and careers programmes to young people and adults in transition. We operate as a specialist delivery partner — working within the contract structures of primes and sub-primes to generate outcomes and evidence that your reporting requires.

Our approach is built on the Trapezium Model® — a proprietary, registered framework that sequences Identity, Character, Competence and Impact in the developmental order that produces lasting, evidence-based change. It is the reason our progression rates are consistently above 90%.
